

EarthLust Birds & Bees bottles are dent resistant, insulated and do not leach toxins.

Stainless steel is safe, hygienic and durable. The #304 high quality food grade stainless steel used has a seamless interior so that no bacteria can gather.

The cap interior has a measurement tool for ounces, but please follow your specific guidelines for feeding.

Hand wash to extend the life of your bottle artwork. Nipples can be sterilized; warm soapy water should be used for all other parts.

Separate metal and plastic parts to recycle.

EarthLust is a very small family-owned company and we're honored that you've purchased our product.

Handmade ethically in China – designed and tested in California.

7oz (207ml)

Instructions

Place the colored ring over the stainless steel neck and screw on the grey ring with nipple or sippy option.

For use with handles, hold the handles in place with the art centered and then screw on the grey ring with nipple or sippy option. The sippy top can be rotated into the correct position for easy drinking.

Make sure that the bottom ridge of the sippy or nipple top is pulled up above the gray ring to form a leak-free seal and that the gray ring is screwed on properly and doesn't leak.

Test by turning upsidedown and go!
